PREFACE

This book provides a comprehensive study and concpt clearing for B. Tech./ BCA/MCA/ PGDCA students. It is our intent to give the students the best available latest information and concepts on the subject. The organization of the book is organized in such a way that it makes strong foundation and depth knowledge of programming skills through 'C' language.

Since high technology changes rapidly, we have presented the material in a generic manner, unbiased toward particular machine implementations. To pace with technology changes, frequent updates with newer editions become a necessity, and we plan to make revisions every year in future.
