P R E F A C E

This book was motivated by the desire we and others have had to further the evolution of the core course in network management. This book developed from notes from online citation. The goal is to give beginning network management majors a solid foundation for further study in network management. However, networks are becoming increasingly important in a much wider range of scientific and engineering disciplines. Therefore, a goal is to give those students who will not take advanced courses in concepts of network management the conceptual tools that the field provides. Finally, a more pervasive goal is to expose all students not only to practical concepts but also to the intellectually rich foundations of the field.

We have tried to integrate effectively the theoretical foundations with the network management models, techniques, standards, many more models. We thus hope to provide a better feel for the soul of network management than might be found in a theoretical course subspecialty. We believe that, as time goes on, all scientists and engineers will take a foundational course similar to the one offered at Stanford upon which this book is based. Such a study in network management should become as standard..

ACKNOWLEDGEMENT

First and foremost, I would like to thank my Appa **Mr.M.Veerasley** for standing beside me throughout my career and writing this book. He has been my inspiration and motivation for continuing to improve my knowledge and move my career forward. He is my rock, and I dedicate this book to him. I thank my better-half **Ponsindhu** for always making me energy and for understanding on those weekend mornings and evening when I was writing this book instead of disturbing. I also thank my wonderful children: **Pozhil Oviya Priya**, **Pozhil Yagavi Priya** and **Pozhil Yazhini Priya**, for always making me smile and for understanding on those weekend mornings when I was writing this book instead of crying. I hope that one day they can read this book and understand why I spent so much time in front of my computer. I'd like to thank my parents **Mrs.A.Devaki Allimuthu**, and **Mrs.T.Sumathi Thilagar**, for allowing me to follow my ambitions throughout my childhood. My families, including my in-laws, have always supported me throughout my career and authoring this book and I really appreciate it. I look forward to discussing this book with my family at future gatherings as I'm sure they will all read it soon. My co-workers, especially my MD, **Mr.Jaganathvelan**, and **Mrs.Bala Subashini**, who showed me the ropes in it. Without that knowledge I wouldn't have ventured into learning about Communication network, which ultimately led to this! I'd really like to thank **Dr.K.Mahalakshmi** for providing me with the opportunity to become the lead author for this book. I appreciate that she believed in me to provide the leadership and knowledge to make this book a reality. **Dr.K.Mahalakshmi** is a great person and a research

guide; without her, this book may not have been written. **Dr.K.Mahalakshmi** and **T.Ponsindhu** collaborated to find the other great authors that helped us write this book. In the end, I believe that the team of authors that was chosen provides the perfect blend of knowledge and skills that went into authoring this book. I thank each of the authors for devoting their time and effort towards this book; I owe a huge thanks to my Brothers **Mr.A.Jayakumar**, **Mr.A.Manikandan** and **MehthaKaviThamizharasu** for providing excellent support and help. I'd like to especially thank **Mr.Balaanand & Mrs.Prema** for trusting me to guide and develop the applications for our department; I think that it will be a great asset to the community! Thanks for everything; I look forward to writing the second edition soon!. I also wish to thank all of our technical supporters **Priyalakshmi and Murugaveni**. All of their efforts helped to make this book complete and we couldn't have done it without you. Last, but definitely not least, I'd like to thank the **Mrs.Sivagami Veerasamy** and **Mrs.Prema Jayakumar**, to provide Strength us with this great work. Thanks to the **MSIT-Coimbatore and MSIT-Tirunelveli** for providing great ideas and support via the mailing; without this help I could not provide the book.

 *Udayakumar Allimuthu*

This book is dedicated to,

My Father (Late) **Mr.C.Allimuthu,**

&

My Elder Brother (Late) **Mr.A.Senthilkumar,**

My Younger Brother (Late) **Mr.K.B.SowntharRajan.**

CONTENTS

1. FUNDAMENTALS OF COMPUTER NETWORK TECHNOLOGY

1	COMPUTER NETWORK TECHNOLOGY- OVERVIEW	1
1.1.	Network Topology	4
1.1.1	Bus Topology	6
1.1.2.	Ring Topology	6
1.1.3.	Star Topology	7
1.1.4.	Mesh Topology	8
1.1.5.	Tree Topology	9
1.1.6.	Hybrid Topology	10
1.2	LAN.....	10
1.2.1	Technologies Used to Build a LAN	11
1.2.2.	LAN Topologies	12
1.2.3.	Components of a LAN	14
1.2.4.	Wireless Local Area Network (WLAN).....	16
1.2.5.	Applications of LANs	16
1.3.	Network Node Components.....	16
1.3.1.	Hubs.....	17

1.3.2.	Bridges.....	18
1.3.3.	Routers	21
1.3.4.	Gateways.....	23
1.3.5.	Switches.....	25
1.4.	WAN	28
1.4.1	Potential Applications.....	29
1.4.2	WSN System Architecture.....	30
1.4.3	WSN Network Topologies.....	30
1.4.4	Components of a WSN Node.....	31
1.4.5	Delivering LabVIEW Connectivity for WSN Systems.....	32
1.5.	Integrated Services Digital Network (ISDN)...	32
1.5.1.	ISDN elements.....	33
1.5.2.	Basic Rate Interface.....	33
1.5.3.	Primary Rate Interface.....	34
1.5.4.	Bearer channels.....	35
1.5.6.	Reference points.....	35
1.5.7.	ISDN User Part.....	36
1.6.	Transmission Technology.....	37
1.6.1.	Broadcast networks.....	37
1.6.1.	Point-to-point networks.....	38

1.7.	Communications protocols and standards....	38
1.7.1.	Universal protocols.....	39
1.7.2.	Standards Organization.....	40

2. OSI NETWORK MANAGEMENT

2.1.	Network Management?.....	43
2.2.	There are four critical aspects of a network management system.....	43
2.2.1.	Fault Management.....	45
2.2.2.	Configuration Management.....	47
2.2.3.	Accounting Management.....	48
2.2.4.	Performance Management.....	49
2.2.5.	Security Management.....	51
2.3.	Network Management Model.....	53
2.3.1.	FCAPS Model.....	53
2.3.2.	Fault Management.....	55
2.4.	Advantages/Strengths of CMIP.....	70
2.5.	Disadvantages/Weaknesses of CMIP.....	71
2.6.	OSI Systems Management Overview.....	72
2.6.1.	Information aspects.....	72
2.6.2.	Organisational aspects.....	75

2.6.3 Functional aspects.....76

3. INTERNET MANAGEMENT (SNMP)

3.1. SNMP: Simple Network Management Protocol.82

3.1.1. Managed Devices.....85

3.1.2. SNMP Managers.....87

3.1.3. SNMP Agents.....88

3.2. Basic SNMP Communication Diagram.....89

3.3. Components of SNMP.....91

3.4. How SNMP works.....92

3.5. Network Management Standards.....99

3.6. Network Management Model.....104

3.7. SNMP and Data Representation.....107

3.7.1. SNMP Version107

3.7.2. SNMP Management.....113

3.8. SNMPv1 Message Header.....116

3.9. SNMPv1 Protocol Data Unit.....117

3.10. SNMPv2 Message Header.....120

3.11. SNMPv2 Protocol Data Unit.....120

3.12. SNMP REMOTE MONITORING.....123

3.13.	The Pros and Cons of SNMP Remote Monitoring.....	127
3.14.	SNMP polling.....	130
3.15.	SNMP trap monitoring.....	132

4. BROADBAND NETWORK MANAGEMENT

4.1.	Broadband networks.....	134
4.1.1.	Communication services.....	137
4.1.2.	A single network for multiple services.....	141
4.2.	Broadband networks and services.....	143
4.2.1.	Types of Broadband Connections.....	144
4.3.	ATM Technology.....	151
4.3.1.	How ATM Networks Work.....	152
4.3.2.	Network Management Framework.....	182
4.3.3.	ILMI.....	183
4.4.	M1, M2, M3, M4 interface.....	184
4.4.1.	The ATM Forum Management Interface Reference Architecture.....	186
4.4.2.	SNMP ATM Management (M1 Interface).....	188
4.4.3.	M3 Interface: Customer Network Management of Public Networks.....	190
