P R E F A C E

Many decision problem that arises in the real world can be modeled and solved as combinatorial optimization problem. This is an active research area where new formulation, algorithms, practical application and theoretical result often proposed and published current challenge in the field involve modeling of hard problems, development of exact method, and the design and experimental evaluation of approximate and hybrid method.

Optimization is a branch of applied metaheuristics and numerical analysis. Almost every problem in engineering, Science, economics, and the life can be formulated as an optimization or a search problem. While some of the problem can be simple that can be solved by traditional optimization method based on mathematical analysis, most of the problem are very hard to solve these using analysis-based approaches. Fortunately, we can solve these hard optimization problems by inspirations from nature. One of the most common metaheuristic that is inspired from the nature is ant colony optimization metaheuristic used to solve the hard optimization problem. In this text, we have formulated the problem of optimal design of network and solved using the Ant colony optimization that is integrated with soft computing technique such as Fuzzy logic.

Other aspect of this book is to study the reliability evaluation technique and development of various algorithm to enumerate the path set/ cutset for the input of reliability evaluation algorithm. As we know, network reliability analysis consist of determining the probability of correct operation of a system

This book introduced the problem of enumeration of

pathset/cutsets for reliability evaluation and optimization of network design using metaheuristic. It presents the most important method, algorithm, and interesting review of the literature.

A roadmap for navigating through the book is given as follows. Except the introductory Chapter, the content of the book can be grossly divided into five chapters and a reference.

Chapter 2 provides a general overview of concepts of graph theory, optimization theory and fuzzy logic and its operator for multi-objective optimization problem. The chapter starts with the short discussion of application of graph theory and related definitions used in this book.

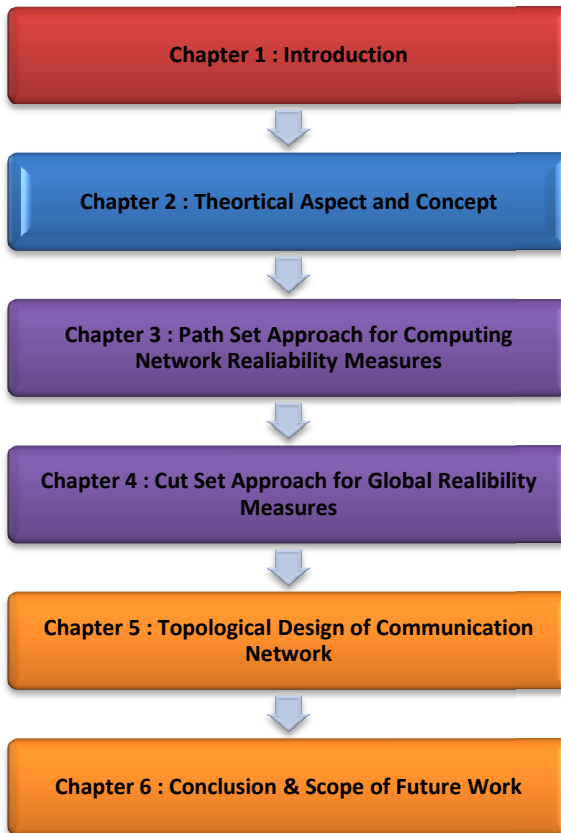

This is followed by an elaborate discussion of combinatorial optimization and multi-objective optimization and multi-objective problem formulation techniques and its metaheuristic solving techniques. Another focus of this chapter is the background of fuzzy logic and well-known fuzzy operators with respect to its use in multi-objective optimization.

In addition to the above, it describes the detailed discussion of ant colony optimization technique for optimization problem and its variants like Ant System, Ant Colony System. Furthermore, chapters also discuss the multi-objective optimization nature of ant colony optimization algorithms.

Chapter 3 describes and elaborates proposed two different modified computationally efficient algorithms for enumeration of spanning tree for global reliability evaluation of complex communication network. Furthermore, an algorithm for multi-source and multi-terminal pathsets enumeration has been proposed in this chapter. The algorithm is simple and easily amenable to

computer implementation using the simplest data structure array. The algorithm is able to find all the minimal paths for directed / undirected scenario

In Chapter 4, algorithms have been modified to generate global minimal cut-sets for a given directed and undirected network for global reliability evaluation. The generation of global minimal cut-sets is an important contribution in the process of networks reliability evaluation.

Roadmap of Book

Chapter 5 discussed the topology design problem of networks in sufficient details. This includes a formal description of the problem, notation, assumption, terminology, cost function and computation of objective value. This chapter also proposed the fuzzy integrated ant colony optimization algorithm for topology design of communication network. The details of the implementation are provided and the algorithm empirically analyzed with different parameter of ACO and followed by the comparative discussion with Multi-objective optimization Ant Colony optimization Algorithm.

Chapter 6 highlights the conclusion of this research and provides direction for future research.

ACKNOWLEDGEMENT

One of the great pleasures of writing a book is acknowledge the effort of many people whose name may not appear on the cover, but whose hardwork, cooperation, friendship and understanding were crucial to the production of the book. Many of our colleagues at *Gautam Buddha University, Greater Noida* and *Maulana Azad National Urdu University, Hyderabad* devoted long hours to this book.

We would like to include a special note of thanks to **Dr. Rajesh Mishra, Professor, Gautam Buddha University** (My Mentor and Research Guide) for organizing the effort for reviewed and updated much of the existng writing and diagrams.

The most important acknowledgment is to the thousand of authors represented in the recommended reading and works cited section in the chapters; their research paper, articles and books have provided the diversity of intresting material.

We would like to thank to my colleagues **Dr. Navaid Zafar Rizvi, Dr. Sandeep Sharma, Dr. Zair Hussain Dr. Anurag Singh Baghel and Mr. Ahsan Siddiquee** for their invaluable assistance and improving the manuscript.

We are fortunate to have worked on this book with the talented and dedicated team of publishing professionals of **VSRD Academic Publishing (A Division of Visual Soft India Private Limited)**.

Last, and most obviously not the least, we thank our families and friend for their support, many years ago an author describe writing a text as a “Locking yourself in a

room” process. While the authors suffer through the writing process, families and friend suffer through their absence. We can only hope that as they view the final product, they feel that their sacrifices were worth it.

CONTENTS

CHAPTER 1 : INTRODUCTION.....	1
1.1. RELIABILITY EVALUATION OF COMMUNICATION NETWORK	5
1.2. TOPOLOGICAL DESIGN OF COMMUNICATION NETWORK	7
1.3. LITERATURE SURVEY	11
1.3.1.SURVEY ON GLOBAL RELIABILITY EVALUATION.....	11
1.3.2.SURVEY ON NETWORK TOPOLOGICAL LAYOUT DESIGN	18
1.4. MOTIVATION.....	20
1.5. PROBLEM AREA'S	22
1.6. METHODOLOGY.....	24
CHAPTER 2 : THEORTICAL ASPECTS AND CONCEPTS	27
2.1 GRAPH THEORY-A TOOL FOR NETWORK RELIABILITY.....	29
2.1.1 NETWORK REPRESENTATION AND DEFINITION	30
2.1.2 DATA STRUCTURE FOR GRAPH REPRESENTATION	34
2.1.3 RELIABILITY MEASURES	36
2.1.4 PATHSET AND CUTSET-DEFINITION AND ENUMERATION ..	38
2.2 APPROACHES FOR RELIABILITY EVALUATION TECHNIQUE	41
2.2.1 PATHSET AND CUTSET (POC) APPROACHES	42
2.2.2 NON-PATHSET OR CUTSET (NPOC) APPROACHES	45
2.3 OPTIMIZATION AND ITS SOLVING TECHNIQUE.....	45
2.3.1 FORMULATION OF OPTIMIZATION PROBLEM	46
2.3.2 TYPE OF OPTIMIZATION PROBLEM.....	52
2.4 CLASSIFICATION OF OPTIMIZATION ALGORITHMS.....	58
2.5 META-HEURISTICS FOR OPTIMIZATION ALGORITHMS	59
2.6 ANT COLONY OPTIMIZATION META-HEURISTIC	63

2.6.1	BIOLOGICAL BEHAVIOR OF REAL ANT AND ANT ALGORITHM	64
2.6.2	RELATION BETWEEN NATURAL AND ARTIFICIAL ANTS.....	70
2.6.3	GENERAL FRAMEWORK FOR ANT COLONY OPTIMIZATION META-HEURISTIC (ACOM)	72
2.6.4	ALGORITHMIC COMPONENT FOR ACO.....	75
2.7	MAIN VARIANT OF ACO ALGORITHMS.....	77
2.7.1	ANT SYSTEM.....	77
2.7.2	ANT COLONY SYSTEM (ACS).....	78
2.8	ACO AND MULTI-OBJECTIVE OPTIMIZATION	80
2.8.1	COMPONENTS OF MULTI-OBJECTIVE ACO ALGORITHM	82
2.9	FUZZY LOGIC FOR MULTI-OBJECTIVE OPTIMIZATION.....	85
2.9.1	OVERVIEW OF FUZZY LOGIC	85
2.9.2	FUZZY SET THEORY (FST).....	86
2.9.3	FUZZY REASONING.....	88
2.9.4	LINGUISTIC VARIABLE	88
2.9.5	FUZZY RULE.....	89
2.9.6	FUZZY LOGIC SYSTEM (FLS).....	91
2.9.7	FUZZY OPERATORS FOR MULTI-OBJECTIVE OPTIMIZATION PROBLEM.....	91
2.10	CONCLUSION.....	95

CHAPTER 3 : PATH APPROACH FOR COMPUTING NETWORK RELIABILITY MEASURES 97

3.1	COMMUNICATION NETWORK RELIABILITY EVALUATION.....	99
3.2	A NEW METHOD FOR ENUMERATING ALL SPANNING TREE USING BRANCH REMOVAL TECHNIQUE	101
3.2.1	DEVELOPMENT OF ALGORITHM	103
3.2.2	ALGORITHMS FOR ENUMERATION OF SPANNING TREE ..	105
3.2.3	FLOW CHART OF PROPOSED ALGORITHM.....	108
3.2.4	ILLUSTRATION OF PROPOSED ALGORITHM	109
3.3	METHOD FOR ENUMERATION OF ALL GLOBAL PATH/ SPANNING TREE USING DEPTH FIRST SEARCH TRAVERSAL.....	121

3.3.1	THE PROPOSED ALGORITHM	121
3.3.2	FLOW CHART OF PROPOSED METHOD.....	125
3.4	ILLUSTRATION OF PROPOSED ALGORITHM	126
3.5	EXPERIMENTAL RESULT AND DISCUSSION.....	137
3.6	A METHOD FOR ENUMERATION OF TERMINAL AND MULTI-TERMINAL PATH.....	142
3.6.1	THE PROPOSED ALGORITHM	143
3.6.2	ILLUSTRATION WITH EXAMPLE.....	144
3.6.3	RESULTS AND DISCUSSIONS	149
3.7	CONCLUSION.....	155

CHAPTER 4 : CUT SET APPROACH FOR GLOBAL RELIABILITY MEASURES..... 157

4.1	AN OVERVIEW OF AHAMAD'S PROPOSED ALGORITHM.....	162
4.2	AN OVERVIEW OF MISHRA AND CHATURVEDI'S PROPOSED ALGORITHM	163
4.3	DEFINITIONS, GENERAL ASSUMPTIONS AND NOTATIONS	164
4.4	PROPOSED MODIFIED CUT SET ALGORITHM (MGCA).....	165
4.5	ALGORITHM ILLUSTRATION	169
4.6	EXPERIMENTAL RESULTS AND DISCUSSION.....	174
4.6.1	DIRECTED NETWORKS	177
4.6.2	UNDIRECTED NETWORKS	179
4.7	COMMENTS AND STRATEGY.....	181
4.8	CONCLUSION.....	183

CHAPTER 5 : TOPOLOGICAL DESIGN OF COMMUNICATION NETWORK..... 185

5.1	PROBLEM STATEMENT AND ASSUMPTION.....	187
5.2	PROBLEM FORMULATION FOR DESIGN OF NETWORK	189
5.3	NETWORK DESIGN CONSTRAINTS.....	191

5.4	MULTI-OBJECTIVE ANT COLONY OPTIMIZATION FOR NETWORK DESIGN	192
5.5	FUZZY LOGIC APPROACH FOR NETWORK TOPOLOGY DESIGN	196
5.6	FUZZY INTEGRATED ANT COLONY OPTIMIZATION ALGORITHM	201
	5.6.1 INITIALIZATION OF ANTS	201
	5.6.2 SOLUTION CONSTRUCTION /ANT ACTIVITY.....	202
	5.6.3 FUZZY HEURISTIC VALUE.....	203
5.7	MINIMUM AND MAXIMUM VALUE OF DESIGN OBJECTIVES PARAMETERS.....	206
5.8	EXPERIMENTAL SETUP.....	207
	5.8.1 SETTING UP DIFFERENT PARAMETER FOR PROPOSED ALGORITHM	210
5.9	RESULTS AND DISCUSSIONS.....	212
	5.9.1 EFFECT OF PHEROMONE DEPOSIT AND EVAPORATION RATE.....	216
5.10	EFFECT OF ANT COLONY SIZE (NUMBER OF ANTS) ...	219
5.11	COMPARISON OF FIACO AND MOACO	229
5.12	CONCLUSION.....	232
	CHAPTER 6 : CONCLUSION.....	233
6.1	SUMMARY.....	236
6.2	FUTURE DIRECTION	239
