P R E F A C E

Historically India has been the world leader in higher education and learning. Our universities like Nalanda and Takshashila were foremost learning centers of the world. The profound knowledge of these centres attracted scholars from across the world. After these seats of learning ceased to exist, great universities of the western world came into being, marking the shift in knowledge production and dissemination from the East to the West.

We need to restore our rightful place and make our universities and colleges producers of knowledge for the world. In this endeavour, the government is committed to ensuring that our higher education institutions achieve the highest levels of global excellence in teaching and research. To start with, it is proposed to provide an enabling regulatory architecture to ten public and private institutions each to emerge as world-class Teaching and Research Institution. They would be facilitated by giving autonomy on academic, administrative and financial matters. It will enable meritorious and talented students of India and abroad, irrespective of their financial status, to realize their dreams and enrol for getting highest quality knowledge, taught by renowned global knowledge providers.

The current review is the beginning of our journey to restore the original mandate of higher education regulators, as facilitators and guides.

 *Dr. Kumardatt A. Ganjre*

ACKNOWLEDGEMENT

I owe my gratitude to all those people who have made this research work possible and because of whom my research experience has been one that I will cherish forever.

My deepest gratitude is to all my mentors. I have been amazingly fortunate to have such personalities who gave me the freedom to explore on my own and at the same time the guidance to recover when my steps faltered. Sir's you taught me how to question thoughts and express ideas. Your patience and support helped me to overcome many crisis situations and finish this research.

I am also thankful to all for encouraging the use of correct grammar and consistent notation in my writings and for carefully reading and commenting on countless revisions of this manuscript.

Your insightful comments and constructive criticisms at different stages of my research were thought-provoking and they helped me focus my ideas. I am grateful to her for holding me to a high research standard and enforcing strict validations for each research result, and thus teaching me how to do research.

I would like to express my heart-felt gratitude to my family. My family has aided and encouraged me throughout this endeavour
