PREFACE

Computers play a key role in our everyday lives. In addition to communication media like television, radio and newspaper, we now have another communication medium, i.e. computers. We use computers to e-mail, to chat, for the Internet browsing, for teleconferencing, for video conferencing, etc. We also use them for e-learning, e-commerce, e-banking, e-governance, e-ticketing and for many more things. I would like to thank the many students that have used my notes for the study purpose over the years. They have provided me with excellent feedback that has assisted me in writing a better, more student focused book.

I originally took the task of writing my own book for the computers course so I could explain fundamental concepts to students in language they would understand. Most books claim to do this, but my experience with a variety of texts had proven otherwise.

This subject/course is designed to teach the basic application and fundamentals of computer in Business of India as well as Global scenario to diverse students, including those who are studying this as a supporting subject for their bachelor or masters degree program. I have tried to write this set of books in such a way that it will fill several needs. In the first place, these books are reference works that summarize the knowledge that has been acquired in several important fields. In the second place, they can be used as textbooks for self-study or for college courses in the computer and information sciences.

In order to understand what are the applications of computer in management and in an organization, students must develop both a foundation of computers and information system and an understanding of the key elements of information system. I wrote this book to provide a framework for learning these necessary skills in a way that emphasizes the uniqueness.

This course is designed to provide you the foundations of Computer Fundamentals and Information System whether you intend to work in field of Information Technology or not, most of these elements will affect you at some point in your career. Either you will be working with some organizations or having people working for you, in both cases you will be dealing with people.

To be understandable and lively means that I need to communicate you. I start chapters as per the requirements. The most important thing you will get out of this course are the basic skills required to succeed in

today's environment which are, you must be able to communicate, think creatively, plan effectively and deal with people.

Your comments will always be taken seriously, and I will adjust my focus on each revision to satisfy your needs.

Thank you.

✍ Shubhendu S. Shukla

ACKNOWLEDGEMENT

The development and publication of this book would not have been possible without help from a considerable number of people. I wish to acknowledge the assistance and support of not only the people and organizations, but also numerous executives who have generously given up their time to discuss issues relating to Information technology in their organization.

Publication work required an environment of academic and team of academician so first, I would like to thank my organization (**SR Group of Institutions, Lucknow**), who provided such an academic environment where my thought converts into real form.

Second, a very special thanks to *Mr. Pawan Singh Chauhan Sir (Hon'ble Chairman SR Group of Institutions)* who always encourage me by their inspirational and motivational thoughts.

Third, A very special thanks to *Mr. Satranjan Sharma Sir (Assistant Director Sir)* and *Mr. Rajesh Singh Chauhan Sir (Deputy Director Sir)* for their encouragement and who both made a major contribution to this book as their input and support were outstanding. Also, thanks to my family members who provided patient support during the writing process and to *Dr. Devendra K. Goswami (Professor and Dean Research, Maharishi University of Information Technology)*, *Dr. Kunwar Abhishek P. Singh (Central Librarian, SR Group of Institutions, Lucknow)*, who made a significant contribution in the writing this book by their support and providing resources.

Dedicated to My MAA

&

God Hanuman Ji ...

CONTENTS

Chapter 1 : Conceptual Framework

1.	Introduction	1
2.	Characteristics of Computers.....	3
3.	The Evolution of Computers.....	5
4.	The Computer Generations	7
5.	Hardware.....	17
6.	Computer Software	30

Chapter 2 : Communication Technology

1.	Computer Networks	41
2.	Network Topologies	45
3.	Electronic Data Interchange (EDI)	50
4.	Internet.....	52
5.	Netiquette	55
6.	Architecture of Network.....	58
7.	NIC card	61
8.	World Wide Web (www)	62

Chapter 3 : Office Tools for Business

1.	Microsoft Word.....	87
2.	Microsoft Excel	104
3.	Microsoft Power Point.....	119

Chapter 4 : Information System Classification

1.	Data and Information.....	127
2.	Operational Support System (OSS) / Business Support System (BSS)	130
3.	Management Support System (MSS).....	135
4.	Transaction Processing System (TPS).....	138
5.	Process Control System (PCS)	144

7.	Management Information System (MIS).....	156
8.	Decision Support System (DSS).....	161
9.	Executive Information System (EIS)	167
10.	Artificial Intelligence (AI).....	172
11.	AI and the Consumers.....	173
12.	Neural Networks.....	175
13.	Fuzzy Logic.....	177
14.	Virtual Reality	178
15.	Expert System (ES).....	183

Chapter 5 : Information System For Business

1.	Enterprise Resource Planning (ERP).....	191
2.	Customer Relationship Management (CRM).....	192
3.	Ethical Issues for IT Security Professionals.....	202
4.	Security of an Information System	203
5.	Business Ethics, Technology Ethics	205
6.	Cyber Crime and Privacy Issues.....	214
7.	Cyber Laws.....	218
8.	The Information Technology Act, 2000	222
9.	Information Technology.....	227
10.	Security and Ethical Challenges of Information Technology	243
11.	Data Flow Diagram	251
12.	Ecommerce	253
