## **PREFACE**

The two-semester anatomy and physiology course that life science and allied health students take is intended for the students who study Human Anatomy and Physiology. The coverage and structure of the textbook were influenced by hundreds of teachers that teach the course, and it follows the scope and order of most Human Anatomy and Physiology courses. The book can be modified by teachers to fit the teaching style that works best in their classroom.

This textbook's illustrations powerfully combine traditional representations and pedagogical innovations to focus student learning. To draw attention to the most crucial elements of any given illustration, color is utilized sparingly. Last but not least, enrichment components give students deeper meaning and relevance, especially in the areas of health, disease, and material pertinent to their planned occupations.

## **ACKNOWLEDGEMENT**

The work of a book or a study can never be executed with one or two people, but with the team work and help of the experts. Our book has compiled with the team work and the righteous advises of our guides, other Pharmacy professionals.

Firstly, we would like to expand our genuine appreciation and thankfulness to IIMT College of Pharmacy, for giving us a chance of writing this book.

We give regard and express our gratitude to our management and director sir, who kept an eye on our work and gave all his support and inspiration which kept us motivated to finish our work duly. We are fortunate enough under his dynamic vision, truthfulness and direction.

We would also like to show our gratitude to our parents, families and friends their supports. We are indebted to all the peer reviewers who with their hard work have made this Book a possible outcome.

At the end, we just want to add that this Book is the result of lots of sleepless nights, labored days.

Thanking everyone who made it possible.
